Nothing Definite.

As we go to press we can gather nothing very definite as to the result of last Tuesday's elections except the defeat of Butler in Massachusetts and the Democratic rout in Connecticut. Virginia claims the overthrow of Mahone, but the news is too meagre as yet to assume certainty. The serpent may yet lie, and, if so, his poison we know has not been lessened by the heat of his exciting canvass. New York does not give us exact figures, and we are yet in doubt as to the result.

Let Us Bear With Each Other.

The dreadful year of drought through which we have just passed, cutting down the crops in many places to less than one half, has made it impossible for most of our farmers to pay out. The balance sheet in most instances will be unfortunately upon the wrong side, and many, very many, will even find it extremely difficult to obtain the necessaries of

This has not been from any fault of the farmer himself, but it has been entirely Providential, and it is for this reason that we should join together and try and bear each others burdens. The year has been a calamatous one. There is scarcely a precedent before us where the parched and burning fields have suffered so terribly as has been the case this year.

Many have already harvested their crops and are now discharging their laborers, as there is no further necessity for them. Improvements cannot be made for the next crop, because the fruits of the husbandman have been everything else but remunera tive this season. The whole outlook is full of gloom, and unless we can stand together and help each other in the trying hour now upon us, heaven only knows what will be our of the premises sold. Purchaser to pay for future. A strong, kindly pull all together will, however, lift us from our roubles, and light may yet come where now all seems gloom and blackness. Let us do it.

No Grease for Him.

"When Greece her knees—Greece her knees—Greece her knees," stammered an embarrased schoolboy, forgetting the next line of his recitation. "There is no occasion to grease anybody's knees!" shouted his teacher. "Go and study your piece." Neither is there occasion to grease your hair. Parker's Hair Balpam is all the dress ang you want. Pestores the original gloss and color to gray or faded hair. Does not soil the linen; not a dye; good for the scalp; prevents falling out.

The Legislature.

now in a short time our law makers will meet again. They will go fresh from our people and will know and understand their wants well The abolition of the lien law-that nefarious and accursed page in our statutes-the prohibition of buying seed cotton without first taking out a license, the abolition of the homestead law, the Railroad Commission, the Columbia Canal fraud and the wiping out of all the useless and expensive offices that have been created for the purpose of giving a soft job to some pet, as well as some measure towards reducing the heavy burden of taxation, should receive their first attention, as they are matters of the most vital importance of anything that will come before them. We trust that they will with zeal and fidelity press these questions to a speedy hearing and dispose of them as the interests of our State Purchaser to pay for papers.

Knowing the feelings of their con stituents, work should be the watchword of every member. Our people are poor now, and taxes are much too high to admit of the useless watse of time spent in gabble and gasing by jobbers and unrepresentative members. The Legislature can do a great deal to better the condition of affairs if they want to, and we sincerely trust that they may do so. Let them go to work with a vim. and they will receive the "well done" of their constituents.

What the Great Fish Culturist Says

What the Great Fish Culturist Says

Last winter I went to Florida, and while there contracted Maiaria in a very severe form. When I went home I went to bed and remained there until spring. My symptoms were terrible. I had dull, aching pains in my head, limbs and around my back. My appetite was wholly gone, and I feit a lack of energy such as I had often heard described, but had never experienced. Any one who has ever had a severe attack of Malaria can appreciate my condition. As I failed to get any better, I determined to try a remedy made by a gentleman in whom I had the greatest confidence. I am happy to say that it effected permanent relief, and that I am well to-day through the influence of Warner's SAFE Cure. After such an experience I can most heartly recommend it to all sufferers.
